Where is Sofar solar located?

To explore Sofar Solar's full profile, request access. This information is available in the PitchBook Platform. To explore Sofar Solar's full profile, request access. When was Sofar Solar founded? Sofar Solar was founded in 2013. Where is Sofar Solar headquartered? Sofar Solar is headquartered in Shenzhen, China. What is the size of Sofar Solar?

Who is Sofar?

SOFAR is a global leading supplier of all-scenario solar PV and energy storage solutions. We offer state-of-the-art solutions for residential, C&I, and utility-scale applications, including:

How much money does Sofar solar make?

The current revenue for Sofar Solar is \$0.00000. How much funding has Sofar Solar raised over time? Sofar Solar has raised \$36.3M. Who are Sofar Solar's investors? Ciit Asset Management, Contemporary Amperex Technology, SB China Venture Capital, Changjiu Group, and Co-Stone Capital are 5 of 11 investors who have invested in Sofar Solar.

What services does Sofar offer?

From technical issues to general inquiries - we provide tailored solutions for your needs. SOFAR is a provider of all-scenario solar PV and energy storage solutions and is committed to being the leader of digital energy solutions.

Where is Sofar located?

Our European headquarters is established in Reutlingen, Germany. Through an extensive service network of over 20 branch offices worldwide, SOFAR ensures to provide localized service and meet the various demands of different regions. Why choose SOFAR?

What makes Sofar unique?

Founded in 2013, SOFAR has always insisted on independent innovation, established a global R&D network with three R&D centers and over 500 of its workforces assigned to R&D, thus gradually establishing the holistic technology and product R&D system.

Rapid fault diagnosis technology. For the weakest links and operating scenarios of photovoltaic inverters that are most prone to failure, a high-performance digital signal processor is used to collect the power consumption information of power semiconductor devices, magnetic components, and automatic switching relays, with voltage and current acquisition accuracy of ...

Os painéis fotovoltaicos utilizam a energia do Sol, recurso abundante em Portugal, convertendo-a em eletricidade. Esta pode ser utilizada para autoconsumo reduzindo a fatura de energia elétrica e a pegada
