

12 panel solar system cost British Virgin Islands

How much does a 12 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$33,240 for a 12-kilowatt system). That means that the total cost for a 12kW solar system would be \$24,598 after the 26% federal solar tax credit discount (not factoring in any additional state rebates or incentives).

Should I install a 12 kilowatt (kW) solar energy system?

If you have high electricity bills, installing a 12-kilowatt (kW) solar energy system in your home can significantly reduce your monthly costs. You want to get the right price for your solar panel installation to maximize your long-term solar savings.

How much electricity does a 12 kW solar system produce?

Below is a table with estimated average electricity production numbers for 12 kW solar energy systems in cities across the United States. As a comparison, the average U.S. household uses 893 kilowatt-hours (kWh) a month, a total of 10,715 kWh per year. We developed these estimates using PV Watts.
