

American Samoa tritium power solutions

Does American Samoa have energy issues?

Although energy burdens pose a real challenge in American Samoa, the territory is working to advance energy justice. For example, the Territorial Energy Office provides home energy efficiency programs to help reduce energy costs for low-income households.

Does American Samoa have a geothermal energy plan?

The 2016 American Samoa Energy Action Plan identifies some geothermal resources, but none of these are viable for commercial electricity generation. The 2016 plan instead emphasizes the development of wind and solar power (Ness, Haase, and Conrad 2016). American Samoa is exploring opportunities for both offshore and onshore wind power generation.

What is American Samoa's energy policy?

American Samoa is committed to leveraging these and other federal funding opportunities to advance its energy goals and priorities moving forward. American Samoa's energy policy landscape constitutes a blend of multilateral agreements, strategic plans, rules, regulations, and dedicated offices.

Is American Samoa a renewable country?

American Samoa's energy sector relies almost entirely on imported fossil fuels, although renewables represent a small but growing power system contribution. The territory possesses substantial solar energy resources, as well as wind and biomass resource potential.

Why is Energy Justice important for American Samoa?

Energy justice is an important concept for American Samoa due in part to energy affordability issues. As Table 8 demonstrates, the approximate baseline home electricity burden in American Samoa in 2019 was 5.45%—compared to an approximate baseline U.S. home electricity burden of 2.11%.

What fuel does American Samoa use?

Pacific Energy South West Pacific Ltd. and Sunrise Oil are American Samoa's fuel suppliers, and both operate facilities in American Samoa. There are three tankers running in the region that belong to Pacific Energy and Sunrise Oil. Fuel for American Samoa comes from Singapore with Busan, South Korea as an alternate provider if needed.

On behalf of the American Samoa Power Authority ("ASPA"), management presents its combined financial statements, narrative overview and analysis of the financial activities of ASPA for the fiscal years ended September 30, 2022 and 2021. The information contained herein is based on current known facts,

Collapsed Australian electric vehicle fast-charger manufacturer Tritium has been acquired by a subsidiary of India-headquartered power solutions company Exicom Tele-systems as it looks to expand its global footprint.

@misc{etde_578790, title = {Tritium in liquid releases of nuclear power plants with VVER and PWR reactors and some ways to solutions of its reduction} author = {Simek, D, and Dubsek, F} abstractNote = {Four various approaches to reducing tritium radioactivity in liquid releases of nuclear power plants are briefly explained: reduction of sources of tritium in LWR ...}

Tritium and deuterium are of particular interest to operators of CANDU stations as deuterium is used as a moderator (in the form of heavy water) and as a result of neutron interactions with heavy water, they produce tritium. Interest in both tritium and deuterium is increasing because of their potential use as a source of fuel for fusion reactors.
