

Are UK government grants available to reduce solar panel costs?

A detailed look at UK government grants available to reduce solar panel costs. Solar panels are becoming an increasingly common option for UK households, giving people the option to produce their own green energy. One issue that many people face, however, is the price of solar panels and organising installation.

Can I get funding for a solar PV system?

Funding for solar PV systems is only available if applied as part of a package that includes a heat pump, solar PV, and an energy storage system. You can get a maximum funding amount of up to £6,000 to install solar panels, which includes a grant of £1,250 plus an optional loan of £4,750.

Are there government grants for solar panels?

There are currently three government grantsavailable to help with the upfront costs of solar panel installation: ECO4: Funding for energy-efficient retrofits to fuel-poor households,or ones with occupants on certain benefits. Each grant has different eligibility criteria, as well as the benefits they provide.

Should you apply for a solar panel grant?

By applying for a solar panel grant, you could receive heavily discounted or even free solar panels, resulting in annual energy bill savings upwards of £1,040. We recently conducted a survey of over 1,540 Independent readers who own solar panels* to understand how they made the most of the solar panel funding available to them.

What does a solar panel grant cover?

Solar grants often only cover specific solar energy system components such as solar panels, inverters and installation costs. Battery storage or advanced monitoring systems are typically excluded from these funding programmes. How much can I save with a solar panel grant?
