

What is Azerbaijan's energy strategy?

The country's first specific energy strategy is also nearing completion. The report encourages Azerbaijan to move swiftly to adopt all these proposals and implement them effectively to ensure secure and sustainable energy in the future. Oil and gas exports continue to dominate Azerbaijan's economy and provide the majority of government revenue.

Why is energy reform important in Azerbaijan?

It is critical to increase efficiency, attract new entrants and investments, and diversify the energy supply in Azerbaijan's current energy system in which gas, electricity and heat are supplied by financially burdened monopolies at strongly subsidised prices.

Should Azerbaijan have an electricity security framework?

An electricity security framework should cover the areas of fuel security, resource adequacy, operational security and governance. Azerbaijan's fuel supply appears secure, as the country has significant natural gas resources and is about to diversify by investing in renewable energy generation.

Should tariff reform be central to Azerbaijan's energy sector reform efforts?

Tariff reform should therefore be central to Azerbaijan's energy sector reform efforts. The oil and gas saved through improved efficiency or through substitution by renewable energy could be exported at much higher prices or turned into higher-value-added petrochemicals.

Does Azerbaijan have a high-voltage network?

In addition, the country has a small amount of wind, solar and other renewable energy generation. Azerbaijan's high-voltage network totals around 7 800 km: 1 505 km at 220 kV; 31 km at 230 kV; 1 542 km at 330 kV; and 477 km at 500 kV. The network has 93 high-voltage substations.

Will Azerbaijan become a regional gas hub?

The IEA expects European gas import demand to rise by around 45 billion cubic metres per year (bcm/a) by 2025. 1 With capacity increases, the SGC could transport twice the 16 bcm/a production of the Shah Deniz 2 field, which could lead to Azerbaijan becoming a regional gas hub.

The existing network of transportation infrastructure allows Azerbaijan to transport not only its own energy resources, but also oil from Central Asia, thus becoming a transit state. ... Transport and Logistic Projects as an Accelerator of Integration within and between the Black Sea region, the South Caucasus and the Central Asia", SAM ...

2018, Azerbaijan has a comprehensive road network that spans 40,568 km, of which approximately 55 per cent of it are paved roads (State Statistical Committee of the Republic of Azerbaijan, 2023). The railway

infrastructure extends more than 2,918 km, and key ports are in Baku and Sumgait. Serving as the primary
