

Baba solar Jersey

Does Babaa apply to fiber optic equipment?

No,because BABAA does not apply to tools,equipment,or supplies brought to the construction site and removed at or before the completion of the infrastructure project. Are there any waivers currently for fiber optic products which are not manufactured in the United States?

Does Babaa apply to removable objects?

BABAA does not applyto "removable" objects that are not an integral part of the structure or permanently affixed to the infrastructure project. For example,security cameras or fire/smoke/carbon monoxide detectors are not subject to the domestic preference requirements because they are removable and are not an integral part of the structure.

Does Babaa apply to infrastructure projects?

BABAA applies to an entire infrastructure project,even if it is funded by both federal and non-federal funds under one or more awards. If FEMA determines that no funds from a particular award under a subject financial assistance program will be used for infrastructure,BABAA does not apply to that award.

What is the Baba requirement?

The BABA Requirement applies to three separate product categories purchased under financial assistance awards for infrastructure projects: (i) iron or steel products; (ii) manufactured products; and (iii) construction materials.
