

# Bangkok solar power Guinea

## How much solar power does Guinea have?

Guinea had an installed PV capacity of just 13 MWat the end of 2020. Infracore Africa,a unit of U.K.-based Private Infrastructure Development Group (PIDG),and Solveo Energie,a unit of French renewable energy developer Solveo,have secured a 25-year power purchase agreement (PPA) for a large-scale solar project under development in Guinea.

## What is the 88 MW solar project in Guinea?

The project is likely the first phase of an 88 MW PV project announced by the French government in April 2017. The French authorities said at the time that the project was expected to be built in two 44 MW phases and to be developed by Solveo Energy. Guinea has had very limited development of solar energy to date.

## How does solar power work in Guinea?

It combines photovoltaic solar energy with hydroelectricity produced in Guinea, reduces the need for thermal energy and reduces the cost of electricity," said Jean-Marc Mateos, President of the Solveo Group. Guinea's has a national electrification rate of 35.4%.

How much power does Guinea have?

Guinea currently has an installed power generation capacity of around 566 MW, most of which comes from hydropower, and an overall access to electricity of around 26%. The Khoumagueli plant will be the first grid-connected solar power plant in Guinea and will deliver 40MW of clean power to Guinea's national grid. Using existing grid infrastructure, Khoumagueli will also be well-positioned to enable a planned West African Power Pool project linking Guinea with its neighbours.

Established in 2007, Bangkok Solar Power Co., Ltd. has been determined to be the leader in Thailand's renewable energy through the past decade. It began when we pushed for a power purchase agreement (PPA) for a solar power plant and sustained its success as the first company reaching a PPA with the government on power generation for the ...
