The Metro of the city of Brussels is an underground massive transit system that provides its service in the capital of Belgium. As of today, it has 4 lines and a total system length of 40 km. All of its 59 stations are located beneath the ground. Tariffs are dynamic and vary according to the amount of time a passenger uses the system.

The tram system in Brussels is one of the largest in the world and trams run both underground and above ground, which can confuse visitors thinking that the underground tram lines are the Brussels Metro, especially lines 3 and 4.. Lines. Currently, Brussels has 19 tram lines that run from the city center to the outskirts.

Belgium has an extended railway system, making it very easy to travel travel by train between all major cities and several smaller towns. Trains are the backbone of Belgium's public transport system and the preferred method of transportation to cover longer distances.

Seit April 2015 reparieren wir Leistungselektronik der Sunways PT30k und PT33k Wechselrichter. Um das Leistungsspektrum zu erweitern und der steigenden Nachfrage an Reparaturen gerecht werden zu können, haben wir das ehemalige Sunways Service Center inkl. aller Pool Geräte und Messmittel gekauft.
