For Fluence, the latest project follows an initial 6MW/6MWh BESS order in Taiwan that was announced in December 2021 and then another for a 60MW/96MWh BESS which Energy-Storage.news reported in April. Each is with a different local partner company.

Fluence provided the BESS units while Taiwan-headquartered industrial and electrical conglomerate TECO Electric & Machinery Co. (TECO) was the local partner for the project. Fluence said it is Taipower's largest BESS project to-date, part of the utility's move to have 1,000MWh of energy storage on its network by 2025.

Global system integrator Fluence has been awarded a 60MW/96MWh battery energy storage system (BESS)

Taiwan Space Agency (short as TASA), formerly the National Space Organization (NSPO) from 1991 to 2023, is the national civilian space agency of the Taiwan, under the auspices of the National Science and Technology Council. TASA is involved in the development of space technologies and related research. [1]

Taiwan has the ability to build out the radar systems to track space debris. To become a booming space hub, Taiwan will need to build radar facilities and connect them with similar facilities worldwide. There is a side benefit. Building Taiwan space situational awareness is helpful not only for the space program but for Taiwan's regional allies.

The 6 MW/6 MWh BESS will be installed in the municipality of Taoyuan, northwestern Taiwan and will utilise Fluence's Gridstack technology. The facility will provide automatic Frequency Control (AFC) services for the ...

Taiwan's space programme began in 1991 with the creation of the National Space Organization (NSPO). This is much later than China and Japan, who launched their space programmes in the 1950s, yet coincides with the launch of fellow "Dragon economies" space programs in South Korea and Singapore, in the late 1980s-early 1990s. ...
