The checklist items contained within are intended for use in procurement of commercial scale lithium-ion BESS, although they may be used more generally for other BESS technologies.

Is an oversized Bess inefficient?

An oversized BESS whose capacity and performance are rarely or never fully utilised is inefficient in several respects. A distinction is also made between energy conversion efficiency and round-trip efficiency. Energy conversion efficiency refers to the efficiency of each step, such as current conversion processes.

What is the optimum temperature for a Bess?

A low self-discharge rate ensures higher round-trip efficiency. The optimum operating temperature for most BESS is around 20 degrees Celsius. However, they tolerate temperatures between 5 and 30 degrees Celsius. Some technologies are more tolerant of temperature variations than others.

Why are Uvea and Futuna Islands a poor place to live?

The soils of Uvea and Futuna islands are of limited fertility, and a number of factors restrict agricultural production. Only about one-fourth of the available land is suitable for cultivation. The system of land tenure, which is based on customary ownership by kin groups, has resulted in a fragmentation of land parcels.
