

Can we send photovoltaic panels to customers

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

Why do energy suppliers buy solar panels?

Energy suppliers buy them to show that the electricity they sell is renewable. Called FIT REGO Boost, Good Energy estimates that a 3kW rooftop solar array could earn around £10 a year from the scheme. Find out more about Good Energy's scheme. Which companies have Smart Export Guarantee tariffs?

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

Do solar panels use a lot of energy?

Many solar panel owners don't use all of the electricity their panels generate, especially if they don't have a battery to store the excess for later use. But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed.

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

How can I get paid for solar panels?

Additionally, Good Energy launched a new scheme in October 2024, which helps you get paid for the certificates (REGOs) produced when your solar panels generate electricity. Energy suppliers buy them to show that the electricity they sell is renewable.
