

To fully realize Cambodia's green investment potential, EuroCham and GGGI are collaborating on the "ESCO Business Ecosystem Strengthening Project," which aims to identify strong existing and emerging clean energy actors (such as technology vendors, EPC companies). This project is an extension of the SWITCH Garment Project which has been carried out by GGGI.

The Ministry of Mines and Energy (MME) of Cambodia realises the need for a properly designed Petroleum Master Plan for the country to understand the entire petroleum supply chain in terms of logistics, storage, and distribution. Full Report. Cambodia Petroleum Master Plan 2022-2040. Contents.

Cambodia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
