Tesla Powerwall2 with Back-up Gateway. The battery storage unit is a standard 13.4kWh Tesla Powerwall 2, but the standard gateway is replaced by the specialist back-up gateway. This looks like a miniature version of the Powerwall2 itself, and contains a substantial relay which completely islands the house in the event of a power cut.

3A per power supply on the mains input is absolute max each power supply would draw. Obviously you can limit the amount of pixels and/or brightness and reduce the load. Orchidman33 has gone further back than I have, which is more specific to your scenario. Calculate the pixels and current. Even at full load the mains should be below 16A draw.

Christmas Island's proximity to Indonesia meant that boats carrying asylum seekers began landing on the island from the late 1980s. The island was the site of the 2001 Tampa affair, when the Australian Government stopped a Norwegian vessel, the MV Tampa, from entering Australian waters to unload 438 rescued asylum seekers on Christmas Island.
