Will a 100 MW PV plant be built in Kosovo?

Kosovo's Ministry of Economy is seeking proposals for the construction of a 100 MW of PV on public land in the town of Rahovec. The plant will be leased to the selected bidder for a period of up to 30 years, backed by a 15-year PPA with Kostt, the national market operator.

How can development finance support solar PV projects in Kosovo?

Many of the solar PV projects currently being developed in Kosovo have benefitted from support from development finance institutions such as the EBRD or the IFC. Indeed, the role of DFIs has arguably been instrumental in helping catalyse investment, and in building other lenders' confidence in providing loans to the sector.

How much debt is used to finance projects in Kosovo?

The share of debt used to finance projects in Kosovo is typically in the 70%, with developers being required to bring the remaining 30%, or more, depending on size of the transaction and the strength of the proponent's balance sheet.

When will a PPA be converted into a contract for difference?

"The PPA shall be converted into a Contract for Difference (CfD) upon the confirmation of the Energy Regulatory Office (ERO) that a liquid functional day-ahead market has been established in the Republic of Kosovo," said Kostt in the tender document. Interested developers have until Aug. 15 to submit their bids.

Which power plants supply most of Kosovo's Electricity?

Imports and two lignite-fired thermal power plants primarily supply most of Kosovo's electricity. The 40-year-old Kosovo A Power Station, located near Pristina, has a generation capacity of 345 MW, while the upgraded Kosovo B Power Station in Obiliq, which is 27 years old, has a capacity of 540 MW.

Is battery storage the lowest cost option in Kosovo?

As such, batteries can be an important complement to a power system dominated by variable renewables; however, as the graph above shows, battery storage may not necessarily be the lowest cost option in Kosovo's context, particularly if greater access to supply from neighboring jurisdictions can be secured through expanded grid interconnection.

A Power Purchase Agreement, or PPA for short, is essentially a contract that outlines an arrangement between two parties: an electricity generator and an electricity buyer. In the context of the UK, this often means a renewable energy project, like a wind farm or a solar power facility, supplying electricity to a business, institution, or ...
