

What type of energy is used in Congo?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Congo: How much of the country's energy comes from nuclear power?

What is Ensol Ltd?

ENSOL LTD is a 100% Tanzanian company registered with Contractors Registration Board (CRB) as a Solar Energy Electrical Contractor. The company is also a corporate member of Tanzania Solar Energy Association, an umbrella organisation for Renewable Energy practitioners. Established in August, 2001, ENSOL LTD specialises in Solar Energy.

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

Why is the electrification rate so low in Congo?

According to the World Bank, nearly half of the Congolese population does not have access to electricity. Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure.
