

Eswatini energy star ups

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Why is Eswatini electrified?

The electrification of Eswatini promises its energy-deprived citizens more than just basic household power. It heralds a new era of economic expansion, immediately offering job prospects in construction and laying the groundwork for internet-driven startups to flourish.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

Why is USL partnering with Eswatini's national grid?

USL's connection to Eswatini's national grid now contributes 31% of local grid-electricity production, pivotal in the country's impressive 32% point increase in electricity access between 2011 and 2021. To electrify the whole population, Eswatini initiated the Partnership for Affordable Renewable Energy in Swaziland (PARES) in 2018.
