What is Solarius PV?

Solarius PV is the professional software for technical design and economic analysis for any type of photovoltaic system connected to national electricity grids (grid-connected). Sizing, financial analysis and single-line diagrams in a single solution, which you can use in every situation and for all kinds of needs.

Does PV*SOL include a Photoplan option?

PV*SOL includes the PhotoPlan option. With just a photo of the roof and a few reference dimensions, you can create a realistic representation of the property as it would look with installed panels. These can be included in customer reports and offer a useful tool for the design process in deciding where arrays should best be placed.

How does Solarius PV 3D work?

With the Solarius PV 3D objects: detail your PV system design by using objects available for free in the extensive online collection of 3D Models, import SketchUp ®, OBJ, 3DS, etc. file formats. The 3D modelling process allows you to identify installation surfaces for your photovoltaic modules with a simple click.

What is PV*SOL premium?

The unique 3D visualization is the highlight of PV*SOL premium. You can visualize all common types of systems in 3D, whether roof-integrated or roof-mounted, whether on small angled roofs, large industrial halls or open spaces - with up to 7,500 mounted modules or up to 10,000 roof-parallel modules, and calculate the shading based on 3D objects.
