

The range of the various UL projects that we have completed varies from designing new cabinets to modifications of existing IEC cabinets. We also offer expert assistance for supplying systems that include electrical and ...

Software for electrical cabinets production. SEE Electrical 3D Panel is a crucial application for companies involved in designing and manufacturing electrical cabinets. It is especially beneficial for manufacturers who produce electrical cabinets in bulk using repeatable elements, ensuring efficient design, production, and assembly processes.

“Cabinet building in particular, with its still high ratio of manual activities, offers very promising approaches here. This ranges from component selection to the pre-assembly of wire harnesses, equipment and housings, right through to assisted final assembly and testing prior to commissioning”, explains Matijas Meyer, CEO of the Komax Group.
