Community Microgrid - Renewable & Resilient. Situation - Community with vulnerable power grid due to grid integrity, storms and fires. Goal - Create resilient & reliable power for critical infrastructure while reducing cost and carbon for the community.

The Philippines has a population of 115 million people across over 7,500 islands; geographical location can make total electrification difficult - especially on a single central grid. Therefore, microgrids that serve local communities have been gaining traction. These systems easily incorporate solar power to ensure access to clean energy.

Freedom Solar Solutions are an Australian owned and operated company that strives to use a wealth of experience and expertise in the solar power industry to improve homes all over Australia for a more sustainable future.
