

Who created the first electricity company in French Polynesia?

The first public electrical energy distribution company in French Polynesia was created in 1910 by Charles Ducorron. It was succeeded by the Etablissements Martin et fils, who held the concession for providing electricity in Tahiti.

How is electricity produced in French Polynesia?

Electricity production in French Polynesia is still heavily dependent on fossil fuels despite the development of renewable energy sources (REn). Electricity production and consumption are unevenly distributed over the territory as they are correlated with the geo- graphical distribution of the population.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does EDT provide electricity to other islands in French Polynesia?

In return, EDT was required to extend its services to other islands in French Polynesia, without a price increase. EDT thus ensures the production and supply of electricity in Tahiti as well as in nineteen other islands and towns in French Polynesia.
