

How do I expand my home assistant storage?

When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

How do I free up space in my home assistant?

There are several things you can do to free up some space: Follow these steps to check the available free disk space. Go to Settings > System > Storage. Under disk metrics, hover over the status bar to view the details. The Network storage section only shows if you have added network storage. The Home Assistant database can become very large.

How do I restore home assistant to a new SD card?

Use a backup to restore Home Assistant from backup on the new SD card. If you are running Home Assistant as a VM, look at the documentation for your hypervisor on how to expand disks for virtual machines. Home Assistant will auto-expand to use the newly added space.

How do I check if my home assistant has free disk space?

Follow these steps to check the available free disk space. Go to Settings > System > Storage. Under disk metrics, hover over the status bar to view the details. The Network storage section only shows if you have added network storage. The Home Assistant database can become very large. Follow these steps to reduce the size of the database.

How do I store backups outside of home assistant?

Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with. It also makes sure you can restore Home Assistant from backup in case you have an issue with your current installation. Go to Settings > System > Backups, and from the list of backups, select the backup you want to keep.

Does home assistant auto-expand?

If you are running Home Assistant as a VM, look at the documentation for your hypervisor on how to expand disks for virtual machines. Home Assistant will auto-expand to use the newly added space. Suggest an edit to this page, or provide/view feedback for this page.

tl;dr - Running `du -shc /* | sort -h` from the SSH add-on will show most everything except add-ons. To see add-on sizes, run `docker ps --size` from console or SSH access into HAOS (not the add-on).. Running this from the SSH add-on will only show you the storage seen by the HA container (I'm probably wording some of this technically incorrectly).

Home assistant storage Singapore

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. Following this the .storage folder was visible in my file editor under config/ and I was able to access the files.

Select the network storage as a default backup path (Settings -> System -> Backup -> 3 dots -> select network storage) Do a full backup; Delete the network storage connection; Try to connect the network storage using the same Name; ...

This guide shows how to install the Home Assistant Operating System Home Assistant OS, the Home Assistant Operating System, is an embedded, minimalistic, operating system designed to run the Home Assistant ecosystem. It is the recommended installation method for most users. onto your Raspberry Pi using Raspberry Pi ...

By default, Home Assistant records everything in the database. If you don't need that much history, then don't record it. (See Recorder Integration). Also, if you don't need the history, you can safely delete the database (home-assistant_v2.db). Home Assistant will start a new one and when it fills up your storage, you can delete it again.

Home Assistant keeps your data local, no need for a cloud. Home Assistant communicates with your devices locally, and will fallback to pulling in data from the cloud if there is no other option. No data is stored in the cloud, and ...

No fan on the Green. I was using 10gig of space and around 2gig ram on average, but I store media and backups using "Home Assistant Google Drive Backup" on "Network storage". I really thought migration was going to be an issue for the combo stick, but the only issue I had was the "Network storage" settings were not restored.

Home Assistant ?????????????????,????????????????????,???????????????????? ???HA?????????:

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. ... If you plan on using the nvme slot for storage, you don't need eeprom on the CM4. The only advantage of wireless is on-board support for Bluetooth, but now you can use esp8266 devices ...

I was hoping someone can help me figure out how I can record footage from a Tapo camera to a storage server on my network. I am using the Tapo control integration and so far it works well. I am now trying to set up an

automation that when the camera senses motion it will start recording for 60 seconds. I am however struggling with the file name (which ...

I saw the news of 2023.6.0 introducing network storage for backups. Running in a docker container I am unable to utilize the new feature, but it got me wanting to reconfigure my docker setup to utilize my Synology NAS for backups. Originally I was going to add a new volume to my container pointing to /mnt/nas that's managed by the host's fstab. The resulting docker ...

Hi, I have a couple of questions I'm hoping someone can help with... I have a Home Assistant Green, and I would like to know if there is a way to increase the storage from 32GB. I found the settings to add external storage (NAS) to Backup, Media and Share (which I have done with an NFS share), but I don't have the ability to move my data disk to any of ...

The counter entities no longer restore their previous manually set configuration (using the - now deprecated - counter nfigure service) on Home Assistant startup. Instead, it will now use the configuration as set in the helper configuration in the UI (or as configured YAML, if used). This behavior is removed, as it caused configuration issues, as the new configuration ...
