

How much does it cost to rent land for solar power generation

Should landlords lease land for solar farms?

With the reduced cost of solar panels and high performance of rental incomes, solar farms offer some great benefits for landlords. This article looks at the various benefits for landlords considering leasing land for solar farms and gives an overview of the current solar energy market.

How much does a solar project cost?

The industry quotes for an acre of rented land for solar projects is typically around the £1,000 mark on average for a fixed payment arrangement. With modern leases lasting between 25 and 40 years (and these days, it's sometimes even longer), landowners will receive an income for the lifetime of the project.

Can I rent land for a solar farm?

Renting land for a solar farm is a commercial lease and is not an agricultural use, so Agricultural Property Relief from inheritance tax may be lost. Transferring ownership of the land to another individual or trading entity before any development starts may be worth considering, to minimise the tax implications, but seek professional advice.

How much does a solar farm cost?

If you're taking on a solar farm project as a landowner-developer, you'll need to shoulder the entire cost of setting things up. And we'll be completely honest here - it's expensive. The average solar farm costs around £375,000 per megawatt-hour (MWh) of electricity produced. Just so you're aware, this takes panel and inverter costs into account.

How much land does a solar farm need?

Generally, a solar farm requires around 25 acres of land for every 5 megawatts of installation capacity. Not all of this land will be usable for a project. So, developers tend to seek around 200 acres for a commercial-scale project to be on the safe side. A minimum of 10 acres is considered the industry standard for smaller projects (around 1MW).

How long does a solar farm lease last?

When solar farms were first rolled out, the lease periods were 25 years but they are now more commonly 40 and some 50 years. Base rents depend on where the land is but, George suggested: "If you said £1,000 an acre you are not going to be a million miles off." At 125 acres, for a site at the scale of Larport, the maths is quite easy, he added.

How much does a solar farm cost? The cost of a solar farm can vary from around £500,000 for small community farms, to over £50 million for large scale solar farms. The total cost depends first on the obvious factor: the ...
