

# How to install photovoltaic panels on solar panels

How do I install my own solar panel system?

To install your own solar panel system, you must first understand such a project's legal and practical aspects. The process begins with thorough planning, from evaluating your home's compatibility for solar panel installation to understanding the technical intricacies involved with your specific situation.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

Can a DIY solar panel installation save you money?

Embarking on a DIY solar panel installation can be rewarding, offering significant cost savings and a better understanding of your home's energy systems. We'll help guide you to simplify the process, from initial planning and preparation to the final steps of connecting your system to the grid.

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

Do I need planning permission to install solar panels on my roof?

When considering the installation of solar panels on your roof, it's critical to understand if you need permission. In the UK, solar panel installations often fall under "Permitted Development," meaning you typically won't need planning permission.
