

How to scan the QR code of Trina photovoltaic panels

Are Trina Solar solar modules corrosive?

Salt spray corrosion tests conducted in accordance with IEC 61701 have shown that Trina Solar's PV modules can be installed near offshore or in the corrosive environment. However, the modules shall not be immersed in water or in a permanently wet environment (e.g., fountains, spindrift, etc.).

Do Trina Solar PV modules have bypass diodes?

Trina Solar PV modules are equipped with bypass diodes in the junction box to minimize module heating and current losses. When using scaffolding, make sure that the scaffolding is in a stable position or with anti-dumping measures, and that the installer should wear a safety belt in accordance with local building codes.

Can a loose connection damage a Trina Solar PV module?

Loose connections will result in damage to the array. This manual covers the requirements for the cleaning procedures of Trina Solar PV modules. Professional installers should read these guidelines carefully and strictly follow these instructions.

How to Mount Trina Solar modules?

Mounting rails run parallel to the long side frame. Trina Solar has tested its modules with a number of clamps from different manufacturers; it is recommended to use fixing bolt of at least M8. The clamp shall not be malfunctioned due to deformation or corrosion during the loading process.

Can Trina Solar guarantee that modules are fully deactivated?

Trina Solar cannot guarantee that modules are fully deactivated. This step should be performed at the installation and annually thereafter to ensure that the PV-Safe function is in good working order. These same steps can be used when activating the feature for system maintenance or emergency services.

What temperature should Trina Solar modules be installed in?

Trina Solar recommends that the module should be installed in a working environment with an ambient temperature of -20°C to 50°C , but not exceed the temperature limit of -40°C to 85°C . The modules shall be installed in shadow-free areas throughout the year. Do not install the PV modules at a place where water damage may occur.
