When Connect was formed in 2013 we inherited already aging pipe systems. Since then we have come a long way in renovating, modifying and upgrading these pipe systems so that they can carry a higher volume of water and have a longer lifespan. Raw water collection systems are constantly being improved to make the most of the rainfall we get.

The intention of St Helena's Energy Strategy, issued in 2016, is to become 100% self-sufficient for consumers connected to the national grid through renewable energy by 1 April 2022. ... and non-economic benefits to Connect and its customers and adhere to performance standards necessary to protect Connect system reliability.
