

Imperium solar Eritrea

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kwh/m2 of solar energy.

Why should Eritrea invest in a solar plant?

This initiative aims to address the energy needs of Eritrea while promoting sustainability and reducing carbon emissions. The solar plant is anticipated to contribute to the nation's energy independence and support its commitment to renewable energy development.

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Will Eritrea become the largest solar zone in the world?

When completed it will become the largest solar zone in the world. Financing Approval date 1 March 2023 Project name: Dekemhare 30-megawatt photovoltaic solar power plant project in Eritrea.

What's it like working with imperium solar?

"Imperium Solar were excellent to work with. The owners went out of their way to keep us informed. The work was done professionally and on time. I would highly recommend them for any solar project."

How much PV capacity does Eritrea have in 2021?

According to the International Renewable Energy Agency (IRENA), Eritrea had just 24 MW of installed PV capacity at the end of 2021. This content is protected by copyright and may not be reused.
