

# Isle of Man best home power station

Is the Isle of Man a gas-fired power station?

This power station is the only gas-fired power station operating on the Isle of Man. With an expected retirement year of 2035, the government of the Isle of Man is working to phase out all fossil fuel fired power generation by 2040.

Who supplied electricity to the Isle of Man?

The Douglas Corporation and the Isle of Man Electricity Board were the sole suppliers on the island, apart from small areas supplied by the Manx Electric Railway Company. By the mid-1950s the Pulrose power station of the Douglas Corporation had a total generating capacity of 15.475 MW. This comprised the following plant: Coal-fired boilers:

Will the Isle of Man be short of baseload power?

Both UK and RoI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

When did the Isle of Man become part of the Utilities Authority?

In 2014 it became part of the Manx Utilities Authority when it was merged with the Isle of Man Water and Sewerage Authority. Following the First World War the development of utilities on the Isle of Man was considered essential.

How is Peel power station controlled?

The station is unmanned and controlled from Pulrose Power Station via a telemetry system. Peel Power Station was opened on 5 May 1995, by the then Chief Minister Sir Miles Walker CBE MHK. This plant is generally used to provide load management services to the UK and security back-up for the Island.

Power on the national grid system is sold differently (ignoring pre-planned deals and contracts) power can be purchased in half hour chunks, and each half hour chunk could very well be a different price. By that I mean power sold at 3pm to 3:30pm will be one price, and power sold at 5pm to 5:30pm will be at a higher price.

Power Stations are situated at Pulrose, Peel, Ramsey and Sulby. Pulrose, including the CCGT, has a capacity of nearly 135MW. Peel has a capacity of nearly 40MW, a diesel generating station at Ramsey has a capacity of 3.6MW, and a small hydro station at Sulby has a capacity of 1.0MW. Network Services

Alan has been a member of the Institution - the professional body for power engineers - since 2003 and is a director and trustee. He's responsible for the Island's three diesel power stations in Ramsey, Pulrose and Peel as well as the Combined Cycle Gas ...

A former power generation station in Ramsey will be reused under plans from the Manx Utilities Authority. The organisation has submitted a planning application to transform the decommissioned unit at its power station on Gardener's Lane. The MUA says it wants to replace asbestos sheet roofing, with an option to put solar panels up in future.
