Sun-Ways" solar installations have the potential to transform energy production for rail networks and electric
mobility. By integrating photovoltaics into the railway ecosystem, we can directly power trains with
renewable energy, but also ...

lication of Solar Cell Reflectance Analysis Using the JASCO V-670 Solar panels (Figure 1) are designed to
absorb as much light as possible over a wide range of angles of illumination from the sun (Figure 2).
Conversely, the solar panel should then reflect as little light as possible when examined in the percent
reflectance (%R) mode.
