Kamada power Tonga

Field tests have shown depending on several factors most power units used in above 32 degrees Fahrenheit conditions no matter if your hydraulic oil tank holds 200 gallons of oil, will exceed 150 degrees during a short 8 hour job. Most power units without hydraulic oil coolers exceed 170 degrees which is way past the recommended guide lines.

For casing up to 20 inches, here's a tong that combines surprising speed with an ability to handle smaller sizes economically (as small as 7 inches). The 20 Standard reaches peak efficiency at just 38 horse power input, thus requiring no "souped-up" power unit. Available torque: 42,000 ft-lb

Types. Power tongs are generally classified into four types: Casing Tongs: Casing power tongs are used to make or break casing tubulars placed in the drill hole in order to maintain the opening of the well. They come in a variety of sizes that measure anywhere from 5' feet to 36 feet, and are designed to deal with lightweight, or high torque casing.
