

Lemania energy New Caledonia

Who is Lemania energy?

Lemania Energy, your first and last stop for battery equipment. Home of the Start Booster. Visit our website. Trust us, it's our business.

What is New Caledonia Energy?

New Caledonia Energy is the entity responsible for developing the project for the new power station that will supply the energy for Sociétés Le Nickel (SLN). The current power station is nearly 50 years old and is highly polluting. The ultimate goal is to have a carbon-neutral plant by 2030, which would be a world first in the mining sector.

Why should you choose Lemania energy?

Lemania Energy strives to provide the industry with the highest quality products. This high standard of quality is enforced across our range and serves as the basis for the trust placed in us by our clients. Any product bearing the Lemania Energy brand is a product of quality in which we have full confidence.

What makes Lemania energy a good brand?

Any product bearing the Lemania Energy brand is a product of quality in which we have full confidence. At Lemania Energy we are continuously aiming to develop new technologies. Our engineers are working hard on a daily basis to make sure we build exactly what you need. Our factory and offices are based in Switzerland.

What is the New Caledonia energy transition scheme?

Guided by the Agence Calédonienne de l'Energie (ACE), the New Caledonia Energy Transition Scheme (STENC) defines the island's energy policy up to 2030.

What is the role of the Caledonian Energy Agency?

The Caledonian Energy Agency's role is to implement the energy transition scheme set out by the government and to contribute to the development of the electrical system. It also promotes the rational use of energy and the development of renewable energies.

New Caledonia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
