

Could Libya be a solar energy exporter?

The desert technology (DESRT-TEC) is one of the largest projects; there was proposed that Libya would be one of the exporters of solar power generated from solar energy to Europe (Griffiths, 2013). The aims of that project to provide Europe Union countries with energy generated from the sun in North Africa and the Middle East countries.

What is the largest solar energy project in Libya?

In June 2022, Total Energies, in collaboration with the General Electricity Company of Libya (GECOL) and REAoL, launched the Sadada Solar Energy 500 MW project in Al-Sadada, which is set to become the largest of its kind in the country.

Can solar PV be used in Libya?

Future prospective of exploiting solar PV has been drawn in Libya. The solar photovoltaic (PV) is one way of utilising incident solar radiation to produce electricity without carbon dioxide (CO₂) emission. It's important here to give a general overview of the present situation of Libyan energy generation.

Who is building a solar power plant in Libya?

Construction of the plant is being led by Alhandasya, a Libyan company specialized in engineering services, electromechanical works and renewable energy development and implementation. The construction of a solar photovoltaic power plant is already underway in Kufra, with a planned capacity of 100 MWp.

Why is solar energy important in Libya?

Due to Libya's geographic location on the cancer orbit line with exposure to the sun's rays during the year and with long hours throughout the day, solar energy may be considered to be one of the main resources (Bannani et al., 2006).

How much solar power does Libya have?

In-depth south regions of Libya, the daily average solar PV power potential is greater than 6.5 kWh/kWp, although the annual average is greater than "2045 kWh/kWp". Fig. 5. Solar photovoltaic power potential in Libya (GSA, 2020).
