

Where is Luxembourg headed in terms of solar energy?

2. Where do you think Luxembourg is headed in terms of solar energy? As part of Luxembourg's Integrated National Energy and Climate Plan (PNEC), the nation aims to increase its share of renewable energy from 11% as of 2020 to 25% by 2030. The share of electricity generated by solar panels would need to reach 1.112 GWh by 2030.

How much solar energy does Luxembourg use?

Today, solar energy makes up 13% of Luxembourg's energy consumption. To reach the renewable energy target of 25% by 2030, the Grand Duchy has introduced a string of incentives. The aim is to make efforts to protect the climate a profitable investment. How much is the subsidy?

Does Luxembourg need photovoltaics?

Luxembourg has an ambitious target to increase the share of energy from renewable sources to 25% by 2030. The development of photovoltaics is one of the solutions recommended in Luxembourg's integrated national energy and climate plan (PNEC, Predicted No-Effect Concentration).

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

How do solar panels work in Luxembourg?

In Luxembourg, the main model is that of self-consumption with sale of surplus. To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This system has a number of advantages:

Are solar panels a profitable investment in Luxembourg?

Luxembourg is ramping up its financial incentives and making the installation of solar panels a very profitable investment until 2025.
