

Can solar power be transformative in South Sudan?

When stability is achieved, smaller-scale systems could become a major component of a vibrant domestic and export clean energy economy. Renewable energy, particularly solar power, has the potential to be transformative in South Sudan for several reasons.

How important is solar energy in South Sudan?

By the end of 2015, installed renewable capacity was enough to supply almost one-quarter of global electricity.²⁰ Although advances in all areas of renewable energy supply are relevant, the evolution of the solar energy sector, and in particular of solar PV, has--potentially--the most immediate importance for South Sudan.

How does electricity work in South Sudan?

Practically all electricity in South Sudan is self-generated, as mentioned, by diesel generators. Internationally funded humanitarian NGOs and UN agencies run their own generators to power their compounds and programs--as do government ministries and offices, even in the main ministerial compound in Juba.

Could South Sudan's energy sector be a building block for peace?

As building blocks for peace, these benefits would help expand and diversify South Sudan's energy sector and contribute to a green pivot to help soften a crippling dependence on fossil fuel.

How much electricity does South Sudan use per capita?

According to the International Energy Agency (IEA), South Sudan averaged only 39 kilowatt hours of electricity consumed per capita for the entire year of 2014. This put South Sudan alongside Haiti at the bottom of the IEA 2016 national rankings.

Does the UN mission in South Sudan use fuel?

Some limited information about fuel usage by the UN Mission in South Sudan (UNMISS, the successor mission to UNMIS, which ended in July 2011) is publicly available, but the information is not broken down explicitly between energy and transportation usage.
