Does Morocco need a solar power station?

Morocco plans to generate 42% of its energy from renewables by 2020, rising to 52% by 2030, with solar, wind and hydropower each providing a third of the total. The new Ouarzazate Solar Power Station will help Morocco meet its renewable power targets. Image: Solar Business Hub The country is well on its way to achieving that goal.

Is Morocco a good place for solar power?

Morocco's previously useless slice of the Sahara is proving a blessing for solar power. Solar thermal technology only works in hot sunny countries. The price is falling, and its growing capacity to store energy is arousing interest.

Can solar power a Moroccan city at night?

A giant plant using energy from the Sun to power a Moroccan city at night will open next month. The solar thermal plant at Ouarzazate will harness the Sun's warmth to melt salt, which will hold its heat to power a steam turbine in the evening.

What is Morocco's largest solar energy project?

Morocco has launched one of the world's largest solar energy projects costing an estimated \$9 billion. The aim of the project was to create 2,000 megawatts of solar generation capacity by 2020. The Moroccan Agency for Solar Energy (MASEN), a public-private venture, was established to lead the project.

Will Morocco build a solar power station in Ouarzazate?

The Moroccan Agency for Solar Energy invited expressions of interest in the design, construction, operation, maintenance and financing of the first of the five planned solar power stations, the 500 MW complex in the southern town of Ouarzazate, that includes both PV and CSP. Construction officially began on 10 May 2013.
