

National compensation standards for solar power generation

What are nged's service standards?

These service standards are known as Standards of Performance(GSoPs). At NGED we aim to deliver exceptional customer service,working to these standards that have been set out by Ofgem. You can find full details of OFGEM's service standards,when they apply and what compensation payment you may be eligible for here:

Should guidance on solar PV be included in the National Policy Statement?

The solar industry very much welcomes the addition of guidance on solar PV to the National Policy Statementfor renewable energy infrastructure. However,there are several provisions which could be strengthened,which we have outlined below.

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported,under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

Should a target for solar generation be included in the NPS?

This equates to roughly 40GW of solar by 2030,and the solar industry body,Solar Energy UK,has demonstrated in its 2021 report "Lighting the Way" that this target is possible. We recommend that a target for solar generation should be included in the NPS.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere,by exporting it back into the National Grid,which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported,under the Smart Export Guarantee (SEG) scheme.
