

Who is Drax Group?

Drax Group is a renewable energy company engaged in renewable power generation, the production of sustainable biomass and the sale of renewable electricity to businesses. Drax operates a generation portfolio of sustainable biomass, hydro-electric and pumped hydro storage assets across four sites in England and Scotland.

Is Drax a carbon negative company?

Drax Group's ambition is to become a carbon negative business by 2030, through innovative greenhouse gas removal technology. We believe investing in our people goes hand-in-hand with enabling the green energy transformation and positive future growth. What is bioenergy with carbon capture and storage (BECCS)?

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

Did Drax buy Opus Energy?

In 2016, Drax Group acquired Opus Energy for £340 million funded by a new acquisition debt facility of up to £375 million. In October 2017, Drax sold Billington Bioenergy for £2 million to an AIM-listed energy company called Aggregated Micro Power Holdings.

When did Drax Group acquire Haven Power & Billington Bioenergy?

In 2009, Drax Group acquired Haven Power - enabling it to sell electricity directly. In 2015, the Group acquired Billington Bioenergy, specialists in providing sustainable biomass pellets for domestic energy systems.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for \$1.87 billion (US\$3 billion).
