

Is Optimus Belgium ready for another 35 years?

With a new generation Van Hoorick on board and new test scopes for validation of lab equipment in the Pharmaceutical sector, we are ready for another 35 years! Optimus Belgium has been strategically positioned between the ports of Antwerp and Ghent, while still keeping touch with the numerous Life Science companies in Flanders.

Is Optimus a good company?

With this experience, I am able to judge that Optimus is in the top league of companies with regards to responsiveness, customer orientation, service level, and knowledge of instrumentation in the O&G industry. Implementing vacuum control, thermoregulation, ... with your instruments Scalable, made-to-measure reactor & distillation equipment

Why did Belgium extend its nuclear power capacity in 2022?

In 2022, Belgium extended 2 gigawatts (GW) of nuclear capacity for ten years, citing the Russian invasion of Ukraine and a commitment to reduce reliance on fossil fuels as reasons. In accordance with this revised plan, the majority of Belgium's nuclear power generation capacity will be phased-out by 2025.

How will energy consumption change in Belgium by 2050?

By 2050, energy consumption from buildings, transport, and industry will fall by around 40%. These efficiency gains will be mainly driven by increasing electrification. Although molecules will remain vital for some parts of industry, system operator Elia expects electricity consumption in Belgium to more than double by 2050.

How is Belgium promoting offshore wind energy?

A key initiative includes promoting offshore wind energy through competitive auctioning processes. In response to the nuclear phase-out, Belgium is set to introduce between 2.0 and 3.6 gigawatts (GW) of new capacity by 2025. In 2008 Belgium consumed electricity 8,961 kWh/person.
