

OutBack's pre-assembled and pre-wired FLEXpower systems are equipped with the OutBack FXR / VFXR(TM) Series inverter/chargers. This means that the most advanced inverter features are now available on the industry's most trusted and proven systems platform, for unmatched flexibility and value.

, is strongly encouraged to ensure prompt response to any potential claims. The warranty does not apply to normal wear and tear and is void for any product or component that has been modified or damaged by any of the following: Damage occurring during installation Removal and reinstallation (aside from factory-

Matt, I have wondered as well if the Radian's built in magnetics act like the balancing transformer which would allow an unbalanced load. By the overload specs 100A at 240V and 200A at 120V, that would seem to be the case, but it isn't clear if the magnetics would overheat if you applied a continuous 4500W or say 5000W 120V load on the inverter.

Single-phase 120V or 230V sinewave output in 12V, 24V, or 48V versions; Programmable for seven different modes with generator assist; Modular, stackable design for up to 9 inverters in three-phase and 10 inverters in grid-tied

Outbackpower com Martinique

Interestingly, pings run 60-70ms, which is equal to or better than any of the many other sites I access daily, yet none of them exhibit this slowness at all. Traceroute shows 17 hops, which is also typical.. It seems that any return traffic (response) from outbackpower is being delayed for some reason, and I would like to resolve this..

Hello there, I am in the process of setting up an off-grid solar power system for a cabin located in a remote area. I have chosen to use OutBack Power products based on their reputation for reliability and performance; but I am new to the specifics of designing and optimizing such a system.
