What's new at Belga solar?

With our new name Belga Solar (formerly Evocells), we reaffirm our identity, commitment to quality, sustainability, and innovation. We look forward to guiding you in your solar energy projects. At Belga Solar, we take our environmental responsibility seriously. That's why we have adopted a proactive approach to reducing our carbon footprint.

Are solar panels a good investment in Belgium?

As soon as you install your solar panels, you'll notice a reduction in your electricity bill. Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!).

Can solar panels be installed in Brussels?

In Brussels additional regulations are added: the solar panels can not be visible from a public space and they do not protrude more than 30cm off the roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

How much subsidy can I get for solar panels in Flanders?

Currently the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is EUR750. In 2024 the maximum subsidy will decrease to EUR375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium?

It makes installing solar panels in Brussels really worth it. I think EUR5600 for 3.9kWp is a bit high, but maybe with the general current increase in price it's normal. Be sure to check with different installers, there are big differences in prices between them.
