One of the most important parts of your solar battery storage system is the inverter which transforms the DC battery voltage back to AC 120V/230V. To select the right inverter for your needs, it is essential to know your load, so basically what do you want to power from your batteries. Add up all your...

This subreddit is for discussions about prepping, with the primary focuses being on: Food & Water: (disinfecting, storage, growing, harvesting, hunting, etc) Survival Strategies: (long and/or short term) Off-grid energy: (wind, solar, hydro) Gear Question's: requests/reviews of your actions/ideas/gear Other: Use common sense here please, and read the rules below

DONE! All solar energy produced will be usable in your house everywhere. No additional cabling needed. With the included sensor you can also make sure, that there is no excess power been exported into the grid! The Plug'n'Play ...

Probably better off doing a cheap off grid setup (12V battery, solar panel, charge controller, and 120V inverter) and pairing it with a cheap garage door opener. Then at least you'll have an outlet and some lights in there as well.

On this site, I'm publishing the data I have collected during my experiments and tests with mostly LiFePO4 cells. I use the ZKE-Tech EBC-A20 and ZKE-Tech EBC-A40L tester for that. Links to both devices can be found here. If you don't have any of these testers but you still would like to analyse the data, you...

GO GRIDLESS Philippines Corp. is a Manila-based solar and energy solutions provider catering to residential and commercial projects. We have speciality across grid-connected solutions, hybrid solutions with batteries, and also off-grid solutions for locations that experience poorly served electricity services.

I have an acquaintance who trades used panels for DIYers and is giving me 10 x 250W Trina panels to use for my off grid project. Pretty much all of the panels removed cannot be used again in another grid tied project due to regulations - all equipment must be on the current standards list and older panels drop off that list each year.

Off-Grid System 1Kw to 50Kw System This solution is intended for areas without a stable grid connection, constant power interruption and outages, or living in remote areas without electricity or unreliable power source.

After the completion of this project, SINOSOAR will contribute renewable energy for 25,000 off-grid households nationwide in the Philippines. The project will extend and consolidate the leading role of SINOSOAR in the off-grid solar ...

Here are items, devices and accessories which don't fit anywhere else. You will find all the fun parts I have used during my battery and solar builds: lights, signs and general stuff people have asked me about. Don't take this too serious ? Bluetooth USB LED Strip Lights 1m -30m length, RGB colour palette, Bluetooth app,...

Well, we should mainly use solar to charge our batteries, right? Sometimes we just need this little bit of extra help to charge our cells from the grid. Some of these chargers below can actually hook up to a DC source and charge from another battery for example. Liitokala Lii-500 NiCd/NiMH/Li-ion charger I'm using this charger...
