The basic idea of an energy storage system is the ideal management of the differences between the generation of electricity and the actual consumption. With a VARTA energy storage system, you can temporarily store the energy you have produced yourself and use it when you actually need it.

Outdoor Activities: Portable solar storage system is suitable for outdoor activities such as camping, hiking and wilderness exploration. It collects sunlight through solar panels, converts it into electricity, and then stores it in the built-in battery. When power is needed, it connects to electronic devices such as tablets, lighting devices, etc. via usb port for charging or power supply.

The powerful, rechargeable lithium battery systems, as either the 5,040Wh portable power station, or combined with the extra battery PAK005-5_BAT for a huge 10,080Wh combined capacity are not only ideal for 4WD camping and caravanning, the system is also suited to off-grid office pods, tiny homes, granny flats and transportable homes.
