This is where SATEC offers a full monitoring solution, enabling the optimization of industrial processes, HVAC spending in commercial and public facilities and many other consumption channels, common to all facilities. A. Industrial. Monitor your industrial process; Prevent equipment burnout and failure via PQ monitoring

SATEC's DC metering solution is highly accurate and functionally versatile. The PRO Series. The PM130. Utilizing shunt resistors, the PM130 offers a basic cost-effective DC metering solution, suitable for retrofit installation in facilities where the shunts are already in place. This is the case quite often in the telecom

market.

When Prof. Branover founded SATEC back in 1987, his vision for it went beyond creating a profitable business for pioneering power analysis. His focus was on providing employment for a wave of immigrants who were about to flock from the former Soviet Union to Israel in the early 1990s and of whom many were highly educated engineers.

The SATEC PMU is a unique product. It is implemented as an add-on card for the PM180, together with other functionalities, such as power quality monitoring and fault recording, making it highly cost-effective. It communicates with 3rd party Phasor Data Concentrators, an important WAMS component in itself, enabling versatility.

SATEC - Solutions And Technology for Energy Control. SATEC's presence in Australia brings together 40 plus years of experience and knowledge for Energy Management Solutions. The culmination of local expertise and SATEC's Global leadership in metering, power quality analysers and software provides a source of knowledge to satisfy customer's ever changing demands for ...

Fitting for both new and retrofit projects, SATEC's Branch Feeder Monitor(TM), is a multi-circuit power meter, monitoring up to 18 three-phase power circuits or 54 single-phase, or any combination. The BFM-II utilizes High Accuracy Current Sensors (HACS) ...

SATEC was first founded in 1987 as a technological business incubator by Prof. Herman Branover. Inspired by the Lubavitcher Rebbe, who predicted a wave of Jewish immigration from the Soviet Union, following perestroika, his aim was to create jobs in a fitting technological environment for these immigrants, of which many were highly educated. Soon after, SATEC started focusing on power metering and developing expertise in this field.

SATEC's on-line service, eXpertpower, collects, archives and analyses energy and power quality data.

Satec global TÃ¼rkiye
