

Are solar panels a scam?

This isn't so much the sign of a scam as it is a word of caution and advice: solar installers should give you a lot of information when providing a quote, including things like model numbers of the solar panels they plan to use. For example, some quotes we've seen just say things like " Qcells panels " or " REC panels ".

Are 'fake' solar companies a scam?

Beware of any company asking you to make a big deposit before they have completed their installation. This is one of the most common ways 'fake' solar companies have targeted consumers - whereby they take a hefty deposit and then never turn up to carry out the installation. This is common solar scam.

How do I avoid solar scams?

Here are some of our recommendations for avoiding solar scams: The saying &quot;there's no such thing as a free lunch&quot;applies when shopping for solar! If you see ads on social media or have a door-to-door salesperson stop by your home and share special programs that pay you to go solar,they're likely,not legitimate.

Is my solar panel installer going out of business?

If you're not sure whether your solar panel installer has gone out of business, and a cold caller is insisting they are taking over, don't take their word for it. In this instance, it turned out to be a scam. Instead, check your original installer's website and try the contact details you were given when your panels were installed.

Do solar panels have a fault?

This was by far the most common cold call solar panel owners said they received,with 44 per cent having been approached about this. However,technical faults with solar panels are rare,with nearly seven in 10 of those surveyed saying they had not experienced a fault with their system.

Do you have a problem with your solar panel?

In fact, solar panel problems are quite rare: nearly seven in 10 owners in our survey told us they had never had a technical problem with their solar PV system. Your solar panel installer should have told you how to check that your system is working correctly, and any maintenance you might need over the years.

Renogy"s three-step installation process is user-friendly and straightforward: Step 1: Install the fix bracket to the surface where you intend to set up the solar panels. Step 2: Attach the fix bracket to the solar panel. Step ...
