

How many solar plants will be built in Serbia?

The agreement commits six new solar plants to be built across Serbia. The Serbian government approved the proposed sites in September. The largest in the deal is a 460 MW facility in the territory of Negotin and Zaječar, followed by a 302 MW plant in Bošnjaci.

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

What is a 1 GW solar power project in Serbia?

1 GW Solar Power Project in Serbia, set to transform the country's renewable energy landscape and boost sustainability efforts.

Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjaci.

How will solar energy impact Serbia?

The project's expected output is 1,600 GWh annually, meeting significant energy demands for households and industries alike. Currently, over 60% of Serbia's electricity comes from fossil fuels. Solar energy offers a practical, scalable solution for diversifying energy sources.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.
