Valmet Automotive will produce Sono Motors" Sion solar electric vehicle at its plant in Uusikaupunki in Finland. The contract manufacturer will provide capacity to produce more than 257,000 vehicles over seven years.

TUCSON, AZ (December 7, 2022) -- Sion Power Corporation, a leading technology developer of next-generation batteries for electric vehicles (EV), today announced plans to expand its existing manufacturing operations in Tucson, Arizona.The planned expansion site is the 111,400-square-foot building at 6950 South Country Club Road. The expansion is expected to be complete by ...

Sion Power is developing a lithium-sulfur (Li-S) battery, a potentially cost-effective alternative to the Li-Ion battery that could store 400% more energy per pound. All batteries have 3 key parts--a positive and negative electrode and an electrolyte--that exchange ions to store and release electricity. Using different materials for these components changes a ...

TUCSON, Ariz.-(BUSINESS WIRE)-Sion Power, a leader in next-generation rechargeable batteries, has reached a major development milestone with its Licerion® Electric Vehicle (EV) technology, producing more than 18,000 multilayer, 6 Ah to 20 Ah lithium metal cells for commercial evaluation. Licerion EV represents a breakthrough in high energy ...

Recently, Sion Power reached a major milestone with the successful production of Licerion lithium metal cells for commercial evaluation. Specifically, the company produced 18,000 multilayer, 6 Ah to 20 AH lithium ...
