

What is a 2modulys XM - socomec modules XM?

2MODULYS XM- SOCOMEC MODULYS XM Ultra-reliable and flexible UPS- built to last Up to 600 +50 kW As flexible as it is reliable,the MODULYS XM - a medium power modular UPS - can be configured to order. Automatic firmware alignment and self-setting

What is socomec - models xM7?

SOCOMECS - MODULYS XM7 High short-circuit solution on-demandThe MODULYS XM maintains compatibility even in situations where the short-circuit current exceeds its standard rating,demonstrating robustness and reliability when handling unexpected abnormal events and electrical loads.

What is modulys RM GP?

MODULYS RM GP is a totally modular UPS system. With its no single point of failure design,it provides reliable power whilst ensuring optimum load protection even during power upgrades or maintenance procedures. MODULYS RM GP is a 3-phase modular UPS system designed for 19" rack integration.

How much power can a modulys GP provide?

The installed power can be increased up to 200 kWby adding hot-swap plug-in power modules for incremental steps of 25 kW. Designed with no single point of failure,the MODULYS GP offers all the advantages of the Green Power 2.0 technology. Fully redundant architecture for maximum availability,minimum MTTR and risk free maintenance.

What is socomec - models XM9?

SOCOMECS - MODULYS XM9 Expert services Manufacturer's maintenance for trouble-free UPS operation Our service contracts are tailored to customer needs, taking into account individual operational constraints, business processes and the unique level of criticality associated with specific applications.
