

Solar panels on the roof

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

Can solar panels work on a flat roof?

Yes, solar panels can work just as well on a flat roof as on a pitched roof, provided they are correctly angled to capture the maximum amount of sunlight. A good racking system can tilt the panels to the optimal angle, ensuring they receive sufficient sunlight throughout the day, which maximises their efficiency.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

Can solar panels be installed on a roof?

“The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.

How do roof-integrated solar panels work?

Technically, roof-integrated solar panels function just like traditional solar panels or solar roof tiles, using photovoltaic cells to convert sunlight into electricity. However, instead of sitting on top of the roof on visible brackets that can affect your home's aesthetic appeal, they become a part of the roof structure itself.

Can a UK roof support solar panels?

As long as your roof is pitched, has enough unshaded space, and doesn't contain spray foam insulation underneath, it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.
