Does Norway need a solar power plant?

In contrast to many European countries, Norway does not have fossil power plants that need to be replaced by renewable electricity production. Norwegian hydropower is currently so cheap that power companies do not consider it attractive to build solar power plants in Norway.

Why is Statkraft a solar power company?

Statkraft has developed solar projects for over twenty years, and our ambitions remain high. Solar power is a clean, abundant and inexhaustible source of energy. We develop and own solar power assets, and are looking for opportunities to expand our activities in Europe, South America and India.

How can I design my own Solar System?

Look up the address for the installation and design your own solar system in our online drawing program. Receive a quote and order the solar system you have designed yourself, from a local company. We have a dealer network throughout Norway that installs solar systems where you live.

How do I install a solar system?

Select the desired building on which you want to have a solar system installed. Get a proposal for a suitable solar cell system based on the building's dimensions. Choose the roof type and draw in pipes, ventilation, snow traps and other obstacles on your roof. See your solar system in 3D.
