

# Solar powerd Liberia

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

How much solar energy potential does Liberia have?

Liberia has a high and consistent potential for solar energy, with an average level of 1,712 kWh/m<sup>2</sup>/year, which could generate 1,400 to 1,500 kWh/kWp. Some 43% of the land is covered with forests (41,790 square kilometers, World Bank 2015), but this does not affect the solar energy potential.

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

Does Liberia generate hydroelectric power?

Liberia generates hydroelectric power with three operational hydroelectric power plants: Harbel (Firestone) with a capacity of 4MW, Mount Coffee (LEC) with a capacity of 64MW, and a community micro hydro in Lofa County named Yandahun with a capacity of 30KW.

How much solar radiation does Liberia have?

In Liberia, monthly solar radiation on a horizontal surface ranges from about 4 kWh/m<sup>2</sup>/day during the rainy season to 6 kWh/m<sup>2</sup>/day during the height of the dry season. This refers to the amount of solar energy that falls on a surface in Liberia each month.

Since 2016, the company has served over 720,000 people and has established more than 30 shops across Sierra Leone and 10 across Liberia. For more information, please visit Photo: Saleswoman in Liberia using a solar driven Easy Solar lamp for her product stall - Easy Solar

A-1 Technical Engineering Solutions is an electrical and solar company in Liberia. A-1 offers these services for residential, commercial and industrial clients. Have any questions? [info@alib](mailto:info@alib) +231-777-730-364 / +231-886-730-364 ... allowing clients to enjoy reliable solar power without financial strain. Expertise and Innovation.
