

Why do we need solar power in Tonga?

Renewables like solar are a significant means for Tonga to expand energy access, stabilize power grids as well as reduce pollution. Considering the shortage of solar expertise and finances for countries like Tonga, the role of independent power producers and the practice of PPA provide solid support to smooth the way for solar deployment.

What is a solar farm & how can it help Tonga?

Producing energy since August this year, and providing power for up to 10,336 households, the Solar Farm is helping The Government of Tonga pursue its National Energy Roadmap plans to see up to 70% of Tongatapu's electricity generation sourced from renewables by the end of 2025.

What is Sunergise Tongatapu solar farm?

The Sunergise Tongatapu Solar Farm is the largest in the South Pacific. It was built as part of a power purchase agreement between Sunergise New Zealand Limited, a Todd Corporation solar company and Tonga Power Limited, with support from the Asian Development Bank.

Who are Sunergise New Zealand & Tonga Power Limited?

This solar project was completed under the partnership between Sunergise New Zealand Limited and Tonga Power Limited with support from the Asian Development Bank (ADB). Sunergise led the construction and meanwhile united local Tongan civil, mechanical and electrical sub-contractors to the team.

What does Sunergise's 6MW solar system mean for Tonga?

As Hu'akavameiliku, Prime Minister of Tonga said at the ceremony: "The successful completion of the Sunergise's 6MW Independent Power Producers solar generation system today, demonstrates the major role renewable energy independent power producers play towards achieving our 70% target by [the] end of [the] year 2025."

Why is Tongan King Tupou VI opening a solar power plant?

Tongan King Tupou VI at the official opening of the biggest solar power plant in the South Pacific. Photo /Sunergise Tonga Prime Minister Hu'akavameiliku Siaosi Sovaleni, who was also at the launch, said the plant indicates the need for independent power - like solar energy - to achieve their National Energy Roadmap.

Nuku'alofa - January 14, 2021: 9.45am (Enviro News): Tonga is accelerating its efforts to achieve the 70% clean energy target by 2030, with solar power as the key driver. The Department of Energy under the Ministry of MEIDECC is collaborating with development partners to monitor ongoing projects and implement new programmes to help the country reach its ambitious targets.

Singyes owns, generates and maintains this solar plant. Once power is generated, Tonga Power only purchases

power generated by Singyes at a lower rate than oil prices. We currently have ...

The community living on the remote island of Niuafo'ou, in Tonga's far north, can now access a 24-hour power supply, through a new solar mini-grid that was commissioned by Crown Prince Tupouto'a 'Ulukalala on ...

Tonga's solar energy potential has garnered global interest. In 2017, the Asian Development Bank (ADB) approved a \$29.9 million grant for the Outer Island Renewable Energy Project. This project aims to establish solar power systems across 22 of Tonga's outer islands. Successful completion of the project is projected to reduce diesel usage ...

Global Photovoltaic Power Potential by Country. Specifically for Tonga, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Battery Energy Storage Systems are a vital component to reaching Tonga's 50% Renewable Energy target by end of year 2020. Battery Energy storage systems will be able to store renewable energy generated from our existing solar and ...

Under the TERM and NDC, Tonga has committed to 50 percent renewable energy generation by 2020, with landfill gas, biomass, wind, and solar energy considered as sources. It is essential that Tonga moves away from reliance on fossil fuels, diversifies its energy generation options, and develops renewable energy resources.

Tonga's solar energy potential has garnered global interest. In 2017, the Asian Development Bank (ADB) approved a \$29.9 million grant for the Outer Island Renewable Energy Project. This ...

The new solar farm is expected to begin operations by April 2020. To achieve its goal of 50% renewable energy by 2020 and 70% by 2030, Tonga is also developing wind and biomass generation sources, and will integrate these with multiple units of battery energy storage.

As a result, Tongan companies also developed extensive experience in the construction of large solar power plants, increasing Tonga's in-country renewable energy skills capacity. Equipment selection and system design, for all three sites, was based on the need for longevity, climate resilience and ease of maintenance, given the maritime ...

A solar-plus-storage project combining 300kW of PV and a 2MWh battery energy storage system (BESS) has been installed in the Polynesian archipelago nation of Tonga. The project on the island of Vava'u was commissioned by Tonga Power Limited (TPL), the country's sole electric utility, on 14 March.

We're committed to increasing solar energy in Tonga. There are roofs all over the islands that could become renewable energy generators, and a huge opportunity for growing solar for our community. We're excited to be leading the charge and partnering with Tonga Power Limited to help get there and proud to be helping Tonga gain access to ...

The Pacific region's biggest solar power plant has been opened in Tonga. Photo / Sunergise. Tonga is leading the way in renewable energy, with the launch of the largest solar farm in the ...

Nuku'alofa - January 14, 2021: 9.45am (Enviro News): Tonga is accelerating its efforts to achieve the 70% clean energy target by 2030, with solar power as the key driver. The Department of ...

Sunergise is the leading developer and operator of solar generation in the Pacific Islands and has delivered over 20MW of solar power implementations in New Zealand, Fiji, Tonga and the South Pacific.

Tonga Climate Change Policy is focused towards building a resilient Tonga by 2035 envisioning an integrated approach to adaptation, disaster risk reduction and mitigation.⁷ Tonga receives high levels of solar irradiation (GHI) of 4.9 kWh/m²/day and specific yield 4.0 kWh/kWp/day indicating a high technical feasibility for solar in the country.⁸

Tonga (/ ' t ? ? ? / TONG-?, / ' t ? ? ? ? / TONG-g?; [a] Tongan:), officially the Kingdom of Tonga (Tongan: Puleʻanga Fakatuʻi ʻo Tonga), is an island country in Polynesia, part of Oceania. The country has 171 islands - of which 45 are ...

Tonga's first photovoltaic solar facility to introduce a stabilising capacitor and micro-grid control system was technically handed-over as the Nanyo Boeki Kaisha Ltd., Japanese-lead consortium of contractors and ...

The ADB worked with Tonga on the development of a hybrid minigrid on Vava'u in 2023, including a 0.3 MW solar generation system and a 1 MW/2 MWh battery energy storage system. That same year, a \$6 million minigrid project serving four islands in the Ha'apai group was commissioned.

The Tonga Outer Island Renewable Energy Project (OIREP) will construct Solar Photovoltaic (PV) power plants on 8 outer islands. The "on-grid" portion will be allocated to Ha'apai and "Eua, while the "off-grid" portion will incorporate "Uiha, Nomuka, Ha'ano, ...

Tonga solar panels at Tofoa Photo: RNZ Pacific / Koro Vaka'uta. The scheme will be the country's second commercially financed public-private partnership after an agreement was signed in Nuku'alofa on Thursday. Tonga Power Limited has signed a deal with New Zealand company, Sunergise, for a 6-megawatt solar farm, spread over three sites, on ...

Tonga's King Tupou VI officially commissioned Matatua Solar Farm last week, another step towards the Kingdom achieving its renewable energy goal. Consisting of 7,440 solar panels, the 2-megawatt facility is

Tonga solar

expected to generate more than 2.8 million kilowatt hours of electricity during its first year of operation.

The Project will result in reducing the cost of electricity for consumers in Vava'u and will reduce Tonga's economical dependency to oil price fluctuations. This is achieved by: Feeding solar ...

Tonga's most remote island, Niuatoputapu, is all set for the development of a new solar mini grid. The King of Tonga, Tupou VI, led a groundbreaking ceremony for the solar PV array which will ...

Implemented by New Zealand company Sunergise, alongside Tonga Power Limited, the Sunergise Tongatapu Solar Farm will assist the Government of Tonga's plans towards reducing the country's reliance on ...

Our venture team Hayden Braddock is the General Manager for Solar Island Technology (SIT) and oversees all new projects and existing projects. He works closely with Tonga Power and local businesses to understand policy and the local electricity market.
